

# Superfast broadband

## Getting Hampshire connected

Many parts of rural Hampshire have very poor internet access. Hampshire County Council, together with its public sector partners, is running a campaign to secure Government funding, to help bring faster broadband to these areas, which will otherwise be missed out.

We also need to prove that families, businesses and communities in rural areas want faster broadband and are willing to pay a one-off connection charge and the monthly charge.

By signing up to this campaign, you will help our efforts to ensure that rural communities can access a similar level of broadband service that most people in towns and cities already enjoy.

You can help by registering your interest with us today at
